Yoruba

# Ifechukwu Uzoma

Enthusiastic and detail-driven Mid-level Developer with hands-on experience in React and React Native. Skilled in creating responsive and dynamic user interfaces, with strong focus on front-end development. Proficient in Javascript, Typescript, HTML, and CSS, with a passion for building mobile and web applications. Known for writing clean, maintainable code and collaborating effectively in team settings. Eager to continue learning and contribute to innovative projects in a fast-paced development environment.

## Experience

2023 - 2024

**Freelance - Project: Wellness-N, Martial-N**

**Mobile Developer**

- Developed and implemented CRUD operations for examiners, events, athletes and coaches, enhancing system functionality and data management.
- Designed and optimized CRUD operations for schools in the Martial section, implementing both create/edit and fetch functionality.
- Delivered clean, efficient code, contributing to the app's stability and performance, ensuring a seamless user experience.
- Worked collaboratively with a diverse team of professionals from different nationalities, contributing to an international project, ensuring smooth communication and coordination across cultures.
- Worked collaboratively in a team setting, contributing to timely updates and code reviews via GitHub.

2025 - Till Date

**SmallClosedWorld International Limited – 2025**

**Freelance-Mobile Developer**

**User Experience | App Architecture | Cross-Functional Collaboration**

- Strengthened app architecture by refactoring the Home Screen and implementing a global user context, reducing redundant logic and improving team efficiency
- Boosted user onboarding and retention by enabling guest access with limited features, in collaboration with product and design teams
- Resolved critical navigation issues and introduced a secure logout flow, enhancing overall user trust and app reliability
- Led integration of in-app analytics, empowering product and marketing teams with actionable user insights
- Fixed persistent engagement bugs (likes and boosts), ensuring consistent user interaction and a smoother app experience
- Shipped key social features—@mentions, post sharing, content reporting, and profile tools—to drive user engagement
- Enhanced navigation with profile tab views and scroll-to-top functionality, making the app more intuitive and user-friendly
